Heart of the space

Every aspect of the award winning REVO Max Inverter Surround Cassette was designed with care to complement your daily needs and elevate your overall space and surrounding environment.

Features a sleek edge-to-edge bottom inlet and all-round horizontal outlet with a grille pattern that is carefully arranged to minimise ceiling contrast and blend in seamlessly with your space.

Japan's Good Design Award Best 100

Germany's iF Design Award

Slim Remote Control

Luminous LED Lights

Simple yet focused indicator light bar that lets you stay in the know without the disturbance.

Sleek Design

Timer
(On/Off Timer)

Easily accessible controls

Notable temperature display

(Energy Saving)

Health

Enjoy enhanced air purification that ensuring your surrounding air remains healthy with the Daikin triple method consist with 3 keys technologies.

3 Keys Technologies of Daikin Triple Methods

The three keys technology of Daikin triple method combining Streamer, Active Plasma Ion and Gin-ION Blue Filter ensuring the cleaner air by three angles of protection.

The decomposition and filtration of viruses and bacteria, allow to have a better quality of air and surroundings.

1st Key Technology: Streamer Technology

Equipped with decomposition technology, Streamer is a type of plasma discharge that eliminates allergens such as pollen, mould, and mites, as well as, deodorises anti-bacterial dust filters so you can breathe with ease.

Mechanism of decomposition by Streamer

Streamer emits high-speed electrons.

The electrons collide and combine with nitrogen and oxygen in the air to form four kinds of decomposing elements with decomposition power.

The decomposing elements provide decomposition power.

2nd Key Technology: Active Plasma Ion

The plasma ion technology uses plasma discharge to release ions into the air, which combine with components of the air to form active species with strong oxidizing power like OH radical. They attach to the surface of fungi and allergens and decompose proteins in the air by oxidation.

Daikin's plasma ions have been proved safe.

Safety concerning effect on skin, eyes, and respiratory

organs

Testing organization: Life Science Laboratories, Ltd.

Name of test: repeated-dose toxicity test

Test number: 12-11 A2-0401

Mechanism of reduction by Active Plasma Ion

Concentration: 25,000 ions/cm-*1

Note:

*1 The number of ions per 1cm³ of air blown into the atmosphere measured near the air outlet during operation with maximum airflow. Test conditions: temperature 25°C, humidity 50%.

Image is for illustration purposes

3rd Key Technology: Gin-ION Blue Filter

The Gin-ION Blue Filter is designed to effectively decompose the virus on the air filter surface. It is to provide better quality of indoor air for healthier life.

This filter is treated with positively charged silver ion which effectively attract virus and bacteria onto its surface then decompose. On top of that, this filter can also prevent any fungal growth on its surface to provide better indoor air quality for healthier life.

Supplied as standard with REVO Max panel.

- ✓ 99% Virus Reduction *¹
 ✓ Skin Friendly*²
 ✓ Non-Toxicity*³
 ✓ Non-Hazardous*⁴
- ✓ Easy Maintenance ✓ No Harm^{*4} ✓ Suitable for Residential & Light Commercial Application
 - ¹ The effect stated here is iffect against the virus that attach to the filter in the experimental facility for 2 hours.
- Test Organization: Ningbo Customs District Technology Center. Test Number: 232000034026. Test Method: Animal Irritation Test: Single-exposure Test, Acute Ocular Irritation Test. (PP Antiviral Screen (ISO 10993- 10:2010)).
- Test Organization: Ningbo Customs District Technology Center. Test Number: 232000034026. Test Method: Acute Oral Toxicity Test. Test Standard: Technical Standard for Disinfection.
- ¹⁴ Test Organization: Ningbo Customs District Technology Center. Test Number: 232000034026. Test Method: Acute Dermal Toxicity Test, Acute Inhalation Toxicity Test. (ISO10993.11-2017).

PM2.5 Filter (MERV14 Ratings)

Particulate matter as small as 2.5 micrometers (µm) can be breathed deep into the lungs, rest assure that your air remains clean as the filter is able to remove particulate matter as small as PM2.5 with MERV14 ratings in accordance to ASHRAE 52.2 Standards.

Testing Organization:

Goldensea

Test Number:

GS-GL-0527-2021-01

Test Method:

Filter performance test based on ASHRAE 52.2

Test Result:

The filter meets MERV14 rating

Standard 52.2 Minimum Efficiency Reporting Value	Composite Average Particle Size Efficiency, % in Size Range, µm		
	Range 1 (0.3-1.0)	Range 2 (1.0-3.0)	Range 3 (3.0-10.0)
14	≥ 75%	≥ 90%	≥ 95%

Bacteria Reduction Performance Efficiency Test

Streamer Device

Streamer discharge decomposes bacteria and mould adsorbed on the filter by irradiating them with an advanced plasma electric discharge. It provides highly effective oxidative decomposition.

Streamer logo display on remote control

Prominent temperature display for remote control with Streamer logo (when the Streamer is turned on)

Bacteria Reduction Performance Efficiency

Testing Organization:

Tropical Infectious Disease Research Center (TIDREC), Universiti Malava

Test Number:

TS4-0390

Test Method:

The antibacterial testin g method fro New Concept Ceiling Cassette was based on JEM 1467 (Appendix F) standard, conducted in a room with volume of 31.2m³.

Test Result:

The ceiling cassette unit, which has Streamer irradiation on the Titanium Apatite (TiAP), was able to give bacteria reduction 99.96% after exposure of 4 hours.

Skin Hydration by Draftness Air

On the average, users of conventional ceiling cassettes showed 13% higher skin dehydration rates after exposure of 30 minutes at 2.6m/s of strong direct air draft, which causes formation of longer and wider lines on the skin surface. In comparison, the REVO Max Inverter Surround Cassette delivers ideal gentle cooling solution at 0.2m/s air movement which reduces the skin dryness and discomfort.

Testing Organization:

Daikin Research and Development Malaysia Sdn Bhd

Test Number:

RG-2021-002

Test Method:

The test examines the effect of air draft on 14 volunteers (9 Males & 5 Females) in a controlled ambient environment using the skin moisture meter and ambient condition: 27°C, RH47% and the readings taken during 30 minutes of exposure.

- REVO Max Inverter Surround Cassette → gentle air draft of 0.2m/s
- Conventional Cassette → strong direct air draft of 2.6m/s

Test Result:

From the test result, after exposing to 0.2m/s gentle indirect air draft from REVO Max Inverter Surround Cassette for 30 minutes, there was no significant difference in skin appearance and no formation of long and wide lines on the skin. Conversely, after 10 minutes of exposure to 2.6m/s direct air draft from the conventional cassette, ① long fine lines were observed on the skin. Then after 30 minutes, ② sulcus cutis (lines on the skin) becomes wider with rough edges, ③ crista cutis (surface between lines) becomes smaller and rough, and ④ additional wide lines in small area is visible. These combination causes the skin to look dull and rough.

Remarks: The test result may vary based on a different room and condition.

Control

Redefine control by using GO Daikin on your smart phone or tablet to manage and control the REVO Max Inverter Surround Cassette no matter where you are.

GO CONVENIENCE

In-home & Out-of-home function allows you to control your AC at anywhere anytime.

Weekly scheduling allows you to set your AC at your preferred timing at a weekly basis.

GO SAVE

- Statistical energy usage graphs that allows you to monitor and keep track of your daily energy usage to ensure an efficient AC operation.
- With this, greater savings can be achieved as you can now smartly monitor your AC energy consumption!
- * The energy consumption values are based on averaged data; Monetary values is calculated based on domestic tariff A at 21.8sen/kWh.

GO COMFORT

Different operational modes allows you to enjoy the different kinds of cooling experience.

GO SHARE

User control sharing easily allows you to share your AC controls with your family members through a simple QR code scanning.

You can unbind the controls or restrict certain app functions of the AC from your family members at any time you desire.

Stay in control. No matter where you are.

Smarter Control, Smarter Life

With just a simple WiFi connection, you can connect and control to create the perfect climate at home, anytime, anywhere. It's that easy!

Simplify your life with GO DAIKIN

The GO Daikin application lets you manage Daikin air conditioners hassle-free, helping you create your ideal environment at home while saving energy.

New Outdoor Features

RZFG125/140A

RZFG50/60/71A

RZFG85/100A

Improved PCB Voltage Shield with Durable PCB feature

With durable PCB feature, it can further protect PCB

- Class 50/60/71/85/100 (1 phase) 130-415V
- Class 125/140 (3 phase) 277-457V

V-cut Propeller Fan

High Durability

Made with an exterior surface from adopted zinc coated heavy gauge galvanised steel finished with weather resistant casing, as well as, longer piping length to ensure long lasting durability.

Longer Piping Length

Series	Max Piping Length	Max Piping Elevation
50	30	15
60	30	15
71	30	15
85	50	30
100	50	30
125	50	30
140	50	30

High Performance Inverter R32 Compressor

Swing compressor providing high efficiency during partial load operation.

Anti-Corrosion Outdoor Heat Exchanger

The Outdoor units come with anti-corrosion properties with it's gold fin heat exchanger and new corrosion resistant aluminium alloy microchannel heat exchanger.

Remark: Gold fins heat exchanger for RZFG50-71A and microchannel heat exchanger for RZFG85-140A.

7

Refrigerant Cooling

Daikin's unique refrigerant cooling system helps to protect the printed circuit board and maintains high cooling capacity even during high outdoor temperatures.

Remarks: For RZFG125/140A only.

Coated Printed Circuit Boards (PCB)

Coated PCB prevent problems caused by humidity and airborne dust. It also protects against salt contained in sea breezes. Both side of the PCB in outdoor units are coated.
